
Shouldn't your "Incident Response"
be "Instant Response?"

Madness

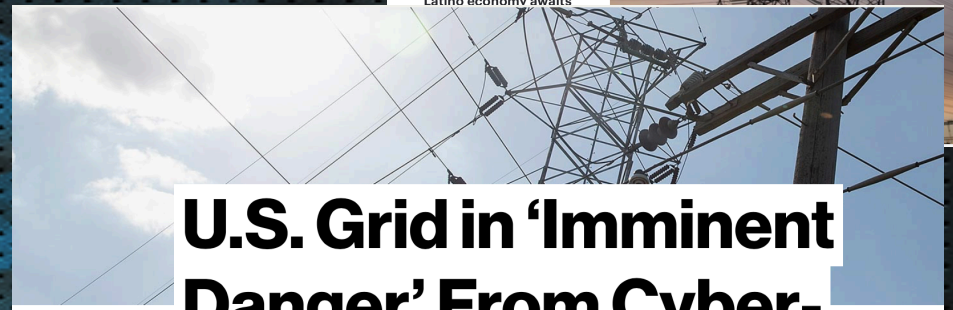
- 2007 – BlackEnergy Malware Developed
- 2014 - 17 Power Related Companies Breached (including 4 Utilities)
- Dec 2012 – 2 US Power Plants Breached
- Dec 2015 – Ukraine Power Grid Hacked/Brought Down
- 317 Million New Malware Variants in 2015



U.S. Grid in 'Imminent Danger' From Cyber-Attack, Study Says

by **Ari Natter** and **Mark Chediak**
January 6, 2017, 10:40 AM EST *Updated on*

→ Threats to U.S. electrical grid are r
→ Increase in smart grid technology

Two US power plants infected with malware spread via USB drive

Investigators find no up-to-date antivirus, system backups for control systems.

Reality

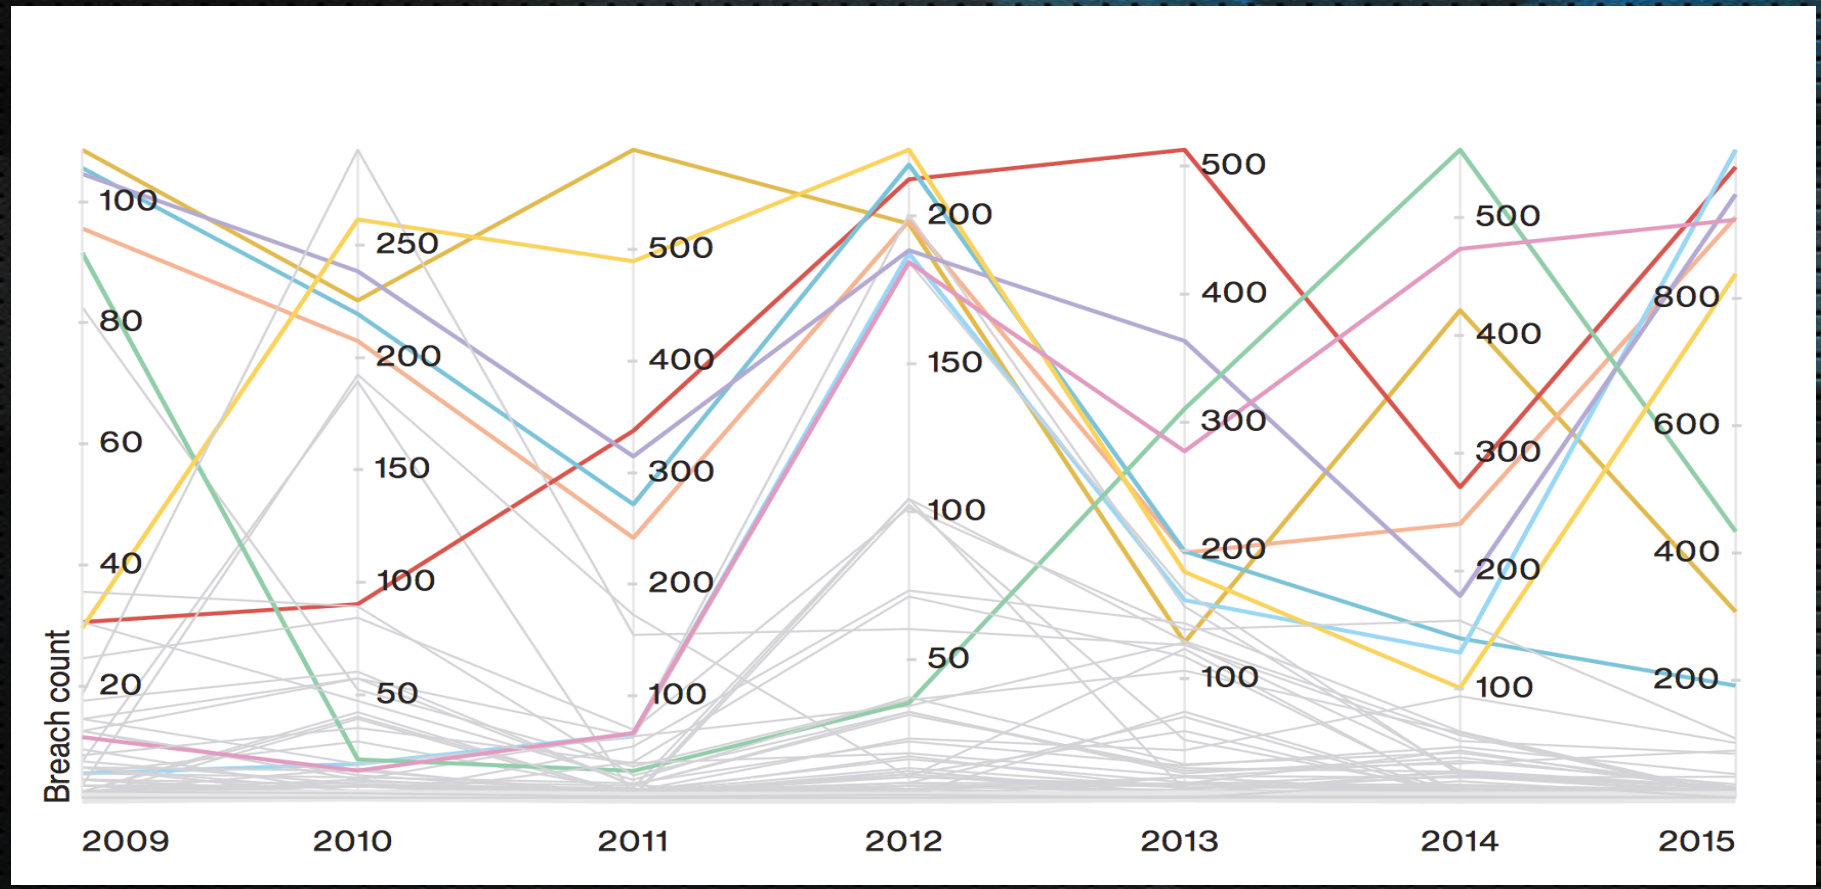
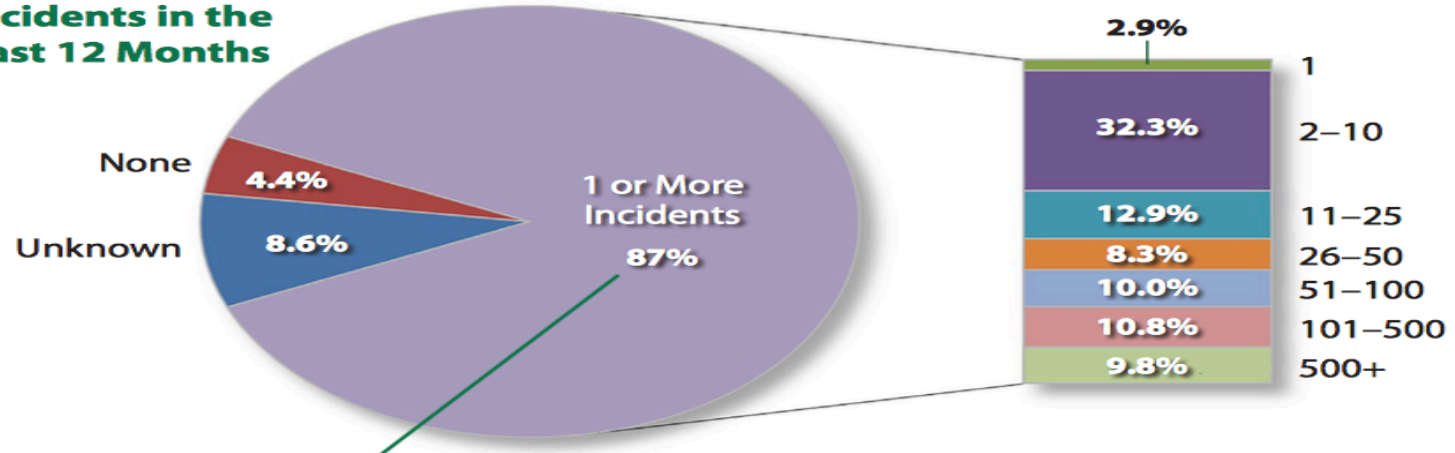
Hackers Will Find a Way.....



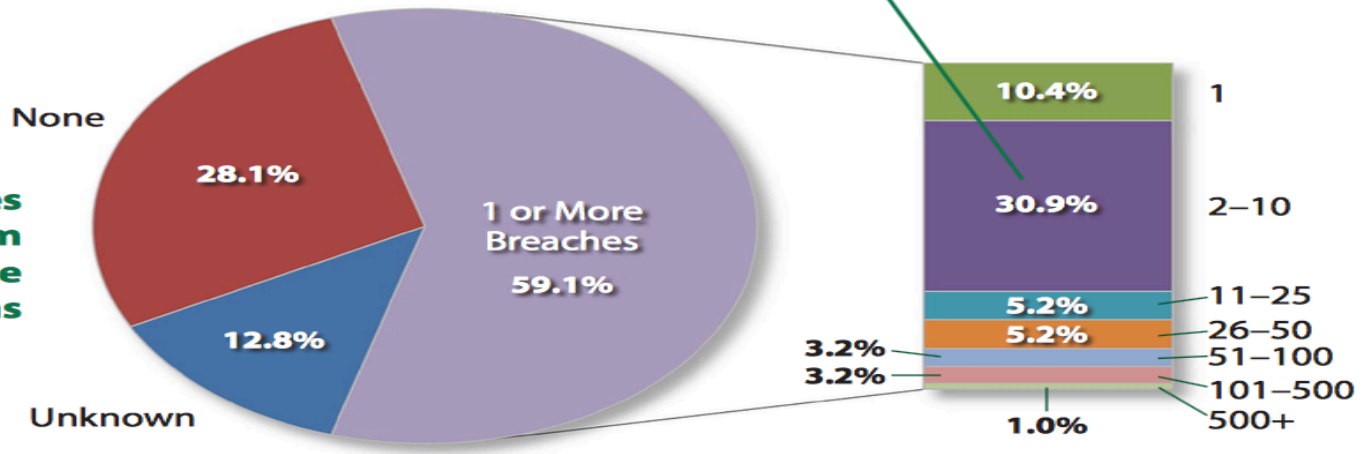
Incidents in the Past 12 Months



87%

87% reported incidents in the past 12 months, and these incidents resulted in actual breaches 59% of the time.

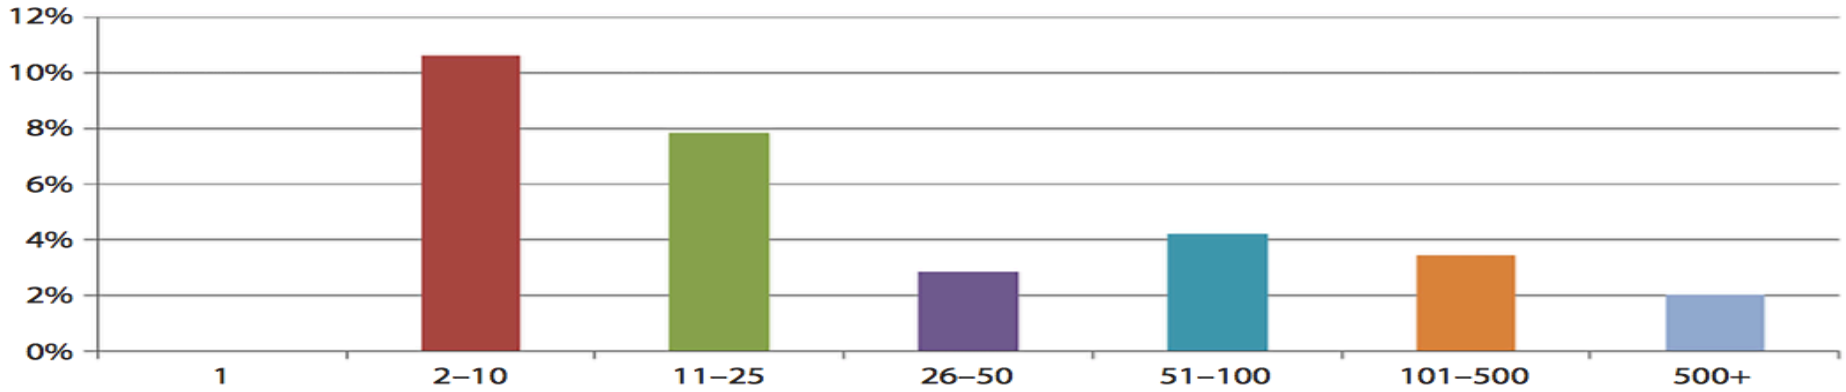
Actual Breaches Resulting from Incidents in the Past 12 Months



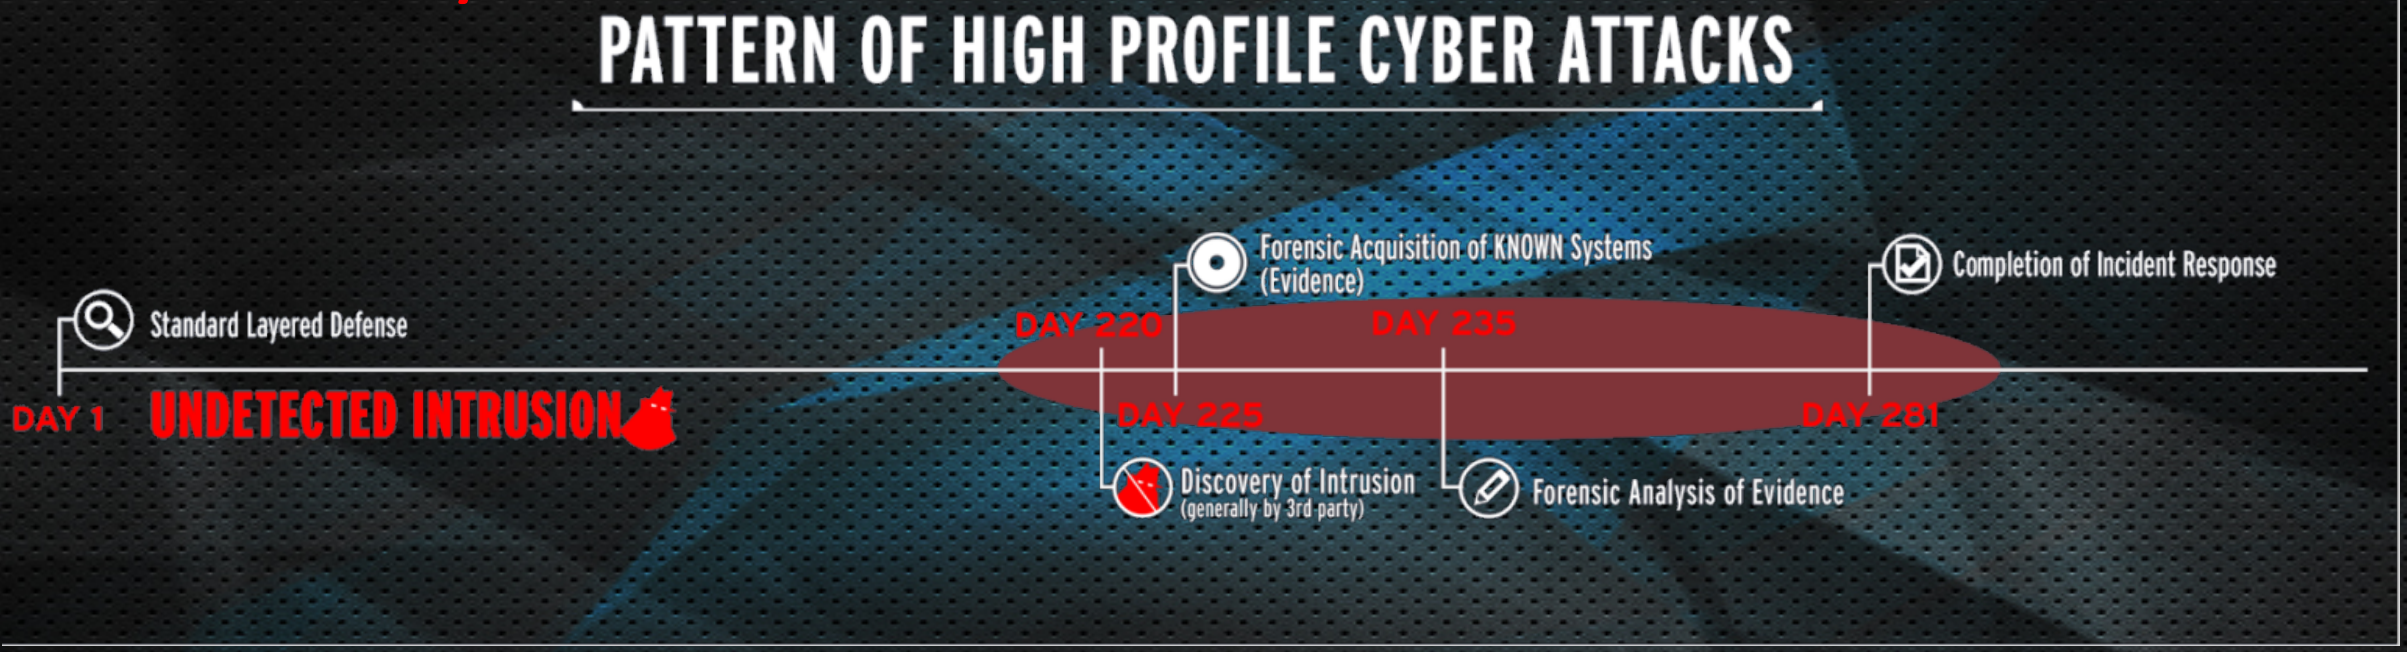
Almost 31% experienced between 2 and 10 breaches, the majority of which came from 2 to 10 incidents.

31%

Number of Incidents that Resulted in 2 to 10 Breaches



Reality Sucks



Compliance is not Capability!!!!!

These tools are FISMA, PCI, and HIPAA Compliant

<u>But They Won't Help You with APT!</u>

Some Uncomfortable Questions……

10 Years After the Discovery of Power Grid Specific Malware:

- Do you know every process/program that is running in your network?
- Are you relying on obscurity to provide security?
- Have you identified all your vulnerability points?
- What are you doing about physical security, EMP?
- How fast can you remediate a situation?
- When have you truly tested your security TTP’s?

Think Asymmetrically About the Problem

Motivators

- Money
- Prestige
- Political
- Military

Strengths

- Motivated
- Patient
- Well Funded
- Talented

Weaknesses

- Dev Time/Costs
- Communications
- Dev Costs
- Individual Specific Capabilities

Technology, Training and People are Necessary to Defeat the Adversary

….And Change the Way We do Business

Current State

- Reactive
- Lack of Endpoint Visibility
- Extremely Poor Alert Context
- Heavy Reliance on Off Line Analysis
- Heavy Reliance on Manual Process
- Fragmented Toolsets
- Obsolete Procedures
- Compliant, But not Capable

NextGEN

- Proactive Hunting
- Complete-Real Time Endpoint Visibility
  - 100% Process Identification
  - Live RAM Analysis
  - Live HD Analysis
- Instant Response
- Live Response – No need to Fly In SME
- Big Data Analytics

Speed to Resolution (S2R)

- Time from Discovery to Remediation
- Dependent on:
  - People
  - Process
  - Tools
- S2R Using Legacy Industry Tools is 10 Months
- NextGen CyFIR S2R = Minutes
